

Building Capacity for Sustainable Development at the National Level

Enhancing Your Leadership Capabilities for the Future of Your Company and Your Nation

Introduction

You will learn about Building Capacity for Sustainable Development at the National Level in this training course on capacity building for sustainable national development. Building capacity is the act of giving organisations and communities the tools they need to adapt, survive, and prosper in a world that is changing quickly. These tools include skills, instincts, talents, processes, and resources.

This capacity-building training course is intended for managers, leaders, and supervisors at all levels. It will teach you best practices in every significant area of capacity-building.

This training session on Course N Carry will emphasise:

- Collaborating: who are your partners?
- The best methods for long-term leadership
- Corporate governance and ethics
- Taking the lead to increase capacity
- Enhancing your abilities and understanding in long-term capacity-building

Objectives

Upon completion of this training programme, you will be able to:

- Talk about the best methods for enhancing national sustainable development capabilities.
- Recognise the significance of managing stakeholders.
- Give an explanation of the proper Corporate Social Responsibility (CSR) procedures.
- List the problems with corporate governance and ethics.
- Enumerate strategies for fostering capacity-building within your company.

Training Methodology

Several tried-and-true adult learning strategies will be employed in this Building Capacity for Sustainable Development at the National Level training programme to

guarantee that the material is understood, comprehended, and retained to the greatest extent possible. This includes lively talks led by trainers and presentations that complement each subject.

Additionally, there will be hands-on workshops where participants can practise and engage in activities connected to the course. To help with learning, there will be enjoyable and useful tasks, quick video presentations, small group work, and feedback.

Organizational impacts

The following will be advantageous to the organisation:

- Building an organization's capacity for national sustainable growth gives it the chance to succeed over the long run, maintain a competitive edge, and progress continuously.
- An enhanced comprehension of the significance of capacity-building
- Acquisition of employable abilities that can be put to use right away following the programme
- Enhanced cooperation with interested parties
- Increased operational efficiencies resulted in enhanced organisational performance.

Personal Impact

The following advantages will be enjoyed by the delegates:

- Gain useful and adaptable skills for the future.
- Become knowledgeable about capacity building
- Will make it possible for participants to comprehend modern best practices
- Improved abilities in long-term leadership
- Enhanced managerial and leadership abilities
