

Corporate Social Responsibility (CSR) in the Oil & Gas Industry

The Significance of Risk to Reputation

Introduction

The variety of problems that businesses in the hydrocarbon sectors confront are covered in this training course on Corporate Social Responsibility (CSR) in the oil and gas sector. With everyone's attention focused on climate change, the oil and gas business is now seen as problematic. Public mistrust and outrage have been stoked by high-profile news reports about disasters, oil spills, and financial wrongdoing. Sometimes the reality of oil extraction and the infrastructure that develops to support it disillusion communities that once celebrated its discovery.

This hasn't always been the case, but some businesses and host governments have managed things skilfully and with excellent strategic vision. With the help of this training programme, you will be able to map stakeholder interests and sustain strong stakeholder relationships within the parameters of company policy and strategy. You will also learn how to identify, monitor, and manage issues that impact your organisation.

This training session on Course N Carry will emphasise:

- Creating a Strategic Framework for Corporate Social Responsibility
- The resources to recognise, monitor, and handle problems
- Identification and mapping of stakeholders
- Strategies and instruments for risk and crisis management
- Tools for assessment and analysis

Objectives

The practical and theoretical aspects of risk, reputation, stakeholder management, and corporate social responsibility will be the main topics of this Course N Carry training course.

After completing this training course on Corporate Social Responsibility (CSR) in the Oil & Gas Industry, you will be able to:

- Perform an audit of communications and reputation.

- Determine the problems that affect your company and make a plan to watch over and handle them.
- Create a plan for managing risks and emergencies.
- Create a plan for managing your reputation and brand.
- Create an action plan for corporate social responsibility.

Training Methodology

A variety of tried-and-true adult learning strategies are employed in this training programme to guarantee that the material is understood and retained to the highest degree possible. This consists of engaging talks that bolster each of the subjects, together with interactive discussion sessions facilitated by the trainer and hands-on exercises. The entire training programme will make use of case studies, many of which are on video.

Additionally, there will be a lot of hands-on sessions where students can practise and engage in activities connected to the course. To help with learning, there will be enjoyable and useful tasks, quick video presentations, small group work, and feedback.
