

Disruptive Innovation - Dealing Essential Change for High Growth

Overcoming Radical Change for Rapid Development

Introduction

The main topic of discussion in this Course N Carry Disruptive Innovation training session is innovation, which is one of the biggest problems that modern enterprises must solve. The life cycles of businesses and products are getting shorter, and there is more competition everywhere. Nowadays, it seems that the most strategically important component of corporate operations is innovation. There are two ways to do this: (i) by innovation that increases the effectiveness of products and processes, and (ii) through innovation that creates a completely new method of conducting business. One could refer to the first innovation as "enabling," and the second as "disruptive." Performance in currently running operations will be enhanced by an enabling innovation. An business can become unique and perhaps take the lead with a disruptive invention.

This training seminar's topic is "Disruptive Innovation". This is intended to provide an organisation the ability to attain and maintain exceptional performance, which is gauged by profitable growth, frequently by implementing a significant overhaul of its whole business model.

The main points of this Course N Carry training seminar are:

- Innovation's strategic importance
- The many effects of disruptive and enabling innovation
- Innovative disruption as a business strategy
- In disruptive innovation, there is risk and profit.
- Bringing disruptive innovation into your team and nurturing it
