

Overseeing and Assessing Education, Training, and Growth

Evaluating Return on Investment and Presenting the Strategic Importance of Training within Your Company

Introduction

One cannot undervalue the role that individuals play in an organization's success. But in this fast-paced, constantly-evolving environment, how can we make sure that our people are grown correctly? Making sure that people are developed successfully, effectively, and efficiently is the primary duty of the training and learning and development function in order to optimize and guarantee organizational performance.

You will receive the necessary information and abilities from this Overseeing and Assessing Education, Training, and Growth training course to maximize the strategic value of your training and development investment. In order to establish effective systems and maximize the return on investment from your learning and development, the course will place a strong emphasis on the analysis and alignment of business objectives, competencies, and talent processes. Along with meeting the expectations of Generation Y and Generation Z through the use of integrated Learning Management Systems (LMS), you will also learn how to create a compelling business case by leveraging metrics and additional sources of strategic research. For individuals who want to manage and lead development activities more effectively and efficiently, this is a must.

This training session on Course N Carry will emphasize:

- Dealing with challenges connected to the administration of the training/learning budget and “training spend”
- Ensuring that the business case for projected expenditures can be made and that suggested training and learning and development programs are pertinent
- Methodologies, techniques, and procedures for practical training evaluation
- Overseeing and directing the learning development and training department
- Crucial actions for transforming into a learning organization

Objectives

Following this training session, participants will be capable of:

- Look at how to measure and maximize return on investment for training.

- Use the methods Analysis of Training Needs
- Create and provide a business case for training that aims to achieve key company goals.
- Assemble a suitable business plan for training and advancement.
- Examine the ROI and cost-benefit of training and development initiatives.

Training Methodology

To guarantee that the material provided is understood, comprehended, and retained to the fullest, a range of adult learning strategies will be employed in this training session on managing and measuring training, learning, and development. Case studies, practical exercises, and group and individual activities will all be part of this. Learning will be aided by conversation, direct feedback, and encouragement to evaluate the concepts put out critically. Participants are invited to explore, discuss, and debate the results and conclusions of group activities using examples from their own work in order to engage and interact with the training session.

Organizational impacts
