

Overseeing Corporate Governance and Islamic Finance

Increasing Business and Shareholder Value

Introduction

You will learn how to develop your company's financial situation, improve corporate governance, and expand access to finance in this vital and engaging Course N Carry Overseeing Corporate Governance and Islamic Finance training course. By doing so, you will be able to safeguard your organization from unethical situations and raise the value that your stakeholders place in it.

The general goal of managing corporate finance is to maximize shareholder value by organizing the most efficient means of raising capital, making good use of it, and controlling the necessary funds and their sources. Investment choices, capital structuring, and financing are all covered by corporate finance operations.

The fastest-growing segment of the finance industry, Islamic finance, is becoming more and more involved in the use of the most appropriate financing and the approaches required to accomplish strategic financial objectives. Sharia (Islamic law) governs Islamic finance, which is governed by both Sharia'a and the financial services regulations that apply to traditional banks.

Corporate governance, which is seen as essential to the efficacy of an organization, aims to ensure that businesses are run ethically and in a way that is acceptable to the society at large. It is not only about maximizing profit.

This instruction session will emphasize:

- Business Finance
- Islamic Finance regulation and its terms
- Important Sharia laws and prohibitions that pertain to money
- Evaluation and funding of national and international capital projects
- To optimize shareholder wealth, employ alternative financial techniques and financial planning.
- Controlling Monetary Risk
- Corporate Governance Techniques, Strategies, and Methods
